The younger generation who are being
trained to sustain our enviable reputation

**Largest Growers of Fruit Trees
in the World.**

Planting Furnished by Harrisons' Nurseries.

If the Glory of the House is Hospitality, and the Blessing of the House is Contentment, then its Beauty is enhanced by the out door planting and its guests enter its wide flung door, knowing beforehand of a hearty welcome.

No home is complete until you have planted your lawn with shrubbery and evergreens, no matter how small the space may be. You need not do all the planting in one year, you can add after the first planting as your taste indicates.

We have a large variety of Evergreens, Shrubs and Shade Trees to select from. We want you to visit our nurseries and orchards.

**AT YOUR SERVICE AT NO COST TO YOU; OUR
LANDSCAPE ARTIST WILL SUBMIT
SUGGESTIONS FOR PLANTING.**

We have a department for Outdoor Planting and at its head one of the best known landscape architects in this section of the country. If you will send us a picture of your home, or space to be planted, we will be very glad to submit plans for planting. If you have had some planting done, we will advise you if any improvement can be made.

Harrisons' Nurseries, Berlin, Md., U. S. A.

HARRISON GROWN APPLE TREES

DELICIOUS

Winter. Brilliant dark red, shading to yellow at the blossom end. Flesh white and tender. Large size. Of comparatively recent introduction, ranks with the best.

PRICES FOR ALL APPLE TREES

	1 to 9	10 to 29	30 to 299	300 to 599	600 to 3000	Trees

CAN BE ASSORTED APPLES, PEACHES, CHERRIES, OR OTHER FRUIT TREES.

FARM BUREAU AND CO-OPERATIVE ORGANIZATION ORDERS SOLICITED.

5% off for cash with order.

YELLOW TRANSPARENT

Yellow Transparent

Ripens extremely early. Skin clear yellow. Flesh white.
The flavor, while slightly acid, is excellent.

Should be shipped under refrigeration.

Size medium to large.

This apple is a favorite sort for all growers who are able to dispose of the crop in nearby markets. It bruises readily and must be handled very carefully. For that reason it should not be used if your market necessitates a long carry unless you use refrigerator cars, in which case, if they are carefully handled, they will carry alright.

YELLOW TRANSPARENT FIRST ON THE MARKET

as it ripens early in July, making excellent eating apples, and selling without difficulty. There is almost no competition at this time; Yellow Transparent leads the field, and is eagerly sought for by those people who find their "apple appetites" impatient.

YELLOW TRANSPARENT TREES BEAR EARLY

and produce nearly every season. They are rather dwarf growers, and may be planted a little closer than most other varieties.

GRIMES

**Ripens fairly late. Skin golden yellow. Flesh yellow.
Flavor rich and spicy; slightly acid.**

Usually known as "Grimes Golden," this apple holds a reputation away ahead of most fall apples because of its appearance and flavor. It is not unusual for Grimes to bring from 50 to 75 cents more per bushel than other apples.

THE FLAVOR IS EXCELLENT

and many people feel about this apple as others do about Golden Bantam corn: "It's worth the difference at any price." The result is that it brings higher prices, which means more money in your pocket.

In the vicinity of Philadelphia, Grimes will be ready for use some time in September, but unless prices are exceptional it should be left on trees until somewhat later, as the flavor will be considerably improved.

USE GRIMES AS A FILLER

It comes into bearing before most of the permanent trees and will help to bear the orchard expenses before the other trees produce any fruit.

McINTOSH

Winter. Color bright deep red.

Flesh white, with slight pinkish tinge. Medium to large.

McIntosh has certain qualities which have served to make it more popular each year. It has the fine flavor that everyone desires, a splendid appearance which sells it on sight, and in addition, it

CAN BE STORED FOR SEVERAL MONTHS

which means that, with proper care—and it needs no special attention or conditions of storage—you can have apples for sale or for use about the home. McIntosh is slightly acid, mellow, and fit for use from the time of picking until early the following year.

AN EARLY BEARER

You won't be forced to wait many years for results, as McIntosh usually bears very early. The early-bearing varieties are extremely desirable for fillers, and McIntosh is no exception. You can get, possibly, ten or twelve crops from the trees before they have to be removed. It is the only way to keep your ground working all the time, and it means a profit in your pocket which otherwise wouldn't be there.

STAYMAN WINESAP

Winter. Dark red skin, tinged with yellow.

Flesh yellow. Medium to large.

It really doesn't seem necessary to describe this variety, as the Winesap is known favorably wherever apples are sold. You can find people in every locality who will buy nothing else. Stayman Winesap is larger than the original Winesap and somewhat later. It is also more prolific.

One of the most desirable points about this tree is that it does not require rich soil; in fact, it seems to do best on land that is dry and hard. Many apples will do well on ordinarily good soil, but there are only a few varieties of winter apples which show

A REAL PREFERENCE FOR POOR SOIL

If you have a patch of land which does not produce according to your expectations, and if your land suffers from dry spells which do not permit grain and vegetables to mature, try an acre of Stayman Winesaps. They will convince you that your land has a decided value—but it must be planted to the right crop.

EASTERN GROWERS PLANT IT LARGELY

in the new orchards, and they are men who know what tree value is. They realize that this apple will produce as good results as many others, and do it on poorer ground. Naturally, not so much capital is required for the investment.

With the old Winesap, the fruit tends to decrease in size as the tree ages; with the Stayman it is generally as large and attractive as ever. It is a strong grower.

YORK IMPERIAL

Winter. Greenish yellow, overlaid with red stripes.

Flesh juicy, slightly coarse. Medium size.

York Imperial has been planted from the East to the West, and, so far as we have heard, has never failed to give satisfaction.

The shape is chunky and somewhat irregular, which makes it a little difficult to pack, and renders it unsuitable for paring machines, but you'll find many people—lots of them orchardists—planting the York Imperial year after year. There are good reasons for this. First of all,

YORK IMPERIAL KEEPS WELL

and if properly stored will be in good condition late next spring; can be laid away in the ordinary cellar, and, if it is handled right, will be in good shape until late May. Unlike many winter apples, York Imperial can be ripened shortly after picking if not stored to prevent it.

The York Imperial is largely used for export, and has come into fine favor with foreign trade. Shipments abroad are snapped up at good prices. Very productive.

ROME BEAUTY

ROME BEAUTY—Yellow, mottled and striped in varying shades of red. The flavor and the quality of the fruit are way above the average, and its appearance and size are extremely valuable points. In almost any market Rome Beauty sells well and brings good profits. Trees are strong growers and yield freely nearly every year.

BLOSSOMS PRODUCED LATE

Rome Beauty is one of the varieties that produces its bloom very late in the blooming season—oftentimes insuring a crop of fruit when many earlier blooming kinds have been caught by a late frost. There are only a few of the leading commercial varieties which bloom as late as Rome Beauty.

ONE OF THE LONGEST KEEPERS IN COLD STORAGE

This apple is especially valuable because it can be kept in storage in perfect condition until quite late in the spring—ranking in this particular with Ben Davis, Gano and Winesap. Rome Beauty nearly always brings top prices because the grower can keep his fruit in storage until the market is in condition to move it at a profit.

OTHER RELIABLE VARIETIES

- BALDWIN**—Bright red. Fruit large, round, with white flesh. Trees are rapid growers and attain a large size, yielding large crops, but do not bear until six or eight years old. We recommend Baldwin highly for Northern Pennsylvania, New York, all of New England, and similar country.
- BEN DAVIS**—Red all over. Size medium to large. Flesh white. Tree is strong-growing and very productive. Fruit will keep until late in the season.
- GANO**—Skin bright red. Flesh white. Recommended especially for commercial orchards on account of its fine appearance, keeping quality and productiveness. Size medium to large.
- JONATHAN**—Late fall. Skin is brilliant red. Flesh white, juicy and fine grained. Size medium to large.
- LIVELAND (Lowland Raspberry)**—Wax white surface covered by blush and stripes of pinkish red. Early.
- MAIDEN BLUSH**—Pale yellow, with red cheek. Flesh white, but not particularly high flavored. Free bearer.
- NERO**—Deep red, with handsome shading; above medium size; of good quality and excellent flavor; one of the longest keepers; mellows for use in the fall if kept in a warm place, but if stored is fine in May and June.
- NORTHERN SPY**—Bright scarlet, with yellow markings. Flesh juicy and highly flavored. Tree a strong, erect grower and free producer. The blooms are produced late in the spring, thus escaping the frosts.
- NORTHWESTERN GREENING** is an exceedingly hardy apple. When used as a cooking apple it has a fine yellow color which renders it remarkably attractive.
- OLDENBURG**—(Duchess of Oldenburg) Early. Yellow streaked with red. Flesh white and juicy. Medium size. Excellent for fillers.
- PARAGON**—(Mammoth Black Twig). Skin quite smooth; Yellow, covered with deep red. Flesh highly tinged with yellow, sub-acid. Trees are vigorous, healthy, and yield quite freely. Prefers low elevations.
- RHODE ISLAND GREENING**—Greenish yellow; somewhat flattened. Flesh clear white, crisp, juicy, and slightly acid. It is a good variety for market.
- WEALTHY**—Fall. Skin almost solid red. Flesh white or little stained, juicy and crisp. Size medium. Trees are very hardy.
- WILLIAMS**—Very early. Skin a dark, rich red. Flesh white, juicy, slightly tart. Size large. Stands shipping well.
- WINESAP**—Winter. Bright red skin. Flesh yellow. Medium to large. Bears regularly.
- WINTER BANANA**—Yellow with reddish blush. Fruit large or extra large. Trees are very free growers.
- YELLOW NEWTOWN**—(Newtown Pippin). Yellow skin, with pure white flesh.
- CRAB APPLES**—Hyslop. Crab of large size; deep crimson.

HARRISON GROWN PEACH TREES

BELLE (Belle of Georgia)

Belle of Georgia is one of the Best White Peaches Grown—Very Prolific. Ripens early in August. Color creamy white, with red cheek. Flesh is white with some red near the pit. Size large. Freestone.

Belle, for some time, has been recognized as the best all-around white peach on the market. It is easily the best shipping white peach of its season, ranking almost with Elberta in this respect. Because of its many desirable qualities it has become standard in the large commercial orchards, and you can find few growers of any importance who do not have a good block of Belle in their orchards.

HILEY

Ripens last of July. Yellowish white skin with deep red cheek. Flesh is white and very juicy. Large size. Freestone.

Hiley follows Carman in order of ripening, and will be about ready to pick when Carman is well off the trees. As you are doubtless aware, the best system for orcharding peaches is to plant a number of varieties, so that your picking force can move from one variety to another without undue haste or loss of time. Hiley will fit in this scheme perfectly; the crop ripens evenly on the trees and a considerable portion of it may be easily removed at one picking.

ONE OF THE BEST SHIPPERS

among the early peaches. Hiley will reach the market in good condition, and bring high prices. You may grow fine peaches of the "melt-in-your-mouth" variety, but if you cannot get them to the markets in good shape, your care and attention are all of no account. Peaches should be packed with great care; it is true that most losses in shipping are due to improper methods of packing, but some varieties will spoil in spite of all your efforts, while others will survive hard knocks and rough treatment and come up smiling. Hiley is of the latter sort, and you should have little trouble with low prices for fruit spoiled while in transit.

HILEY IS HARDY

Few peaches are more hardy than Hiley—it will please you in this respect. The tree is large and vigorous, grows almost as fast as Belle, with buds which are seldom affected by chilly snaps in the spring. One of its great points lies in its productiveness; it produces great quantities of easily salable fruit. Comes into bearing the third or fourth year. Equally as good for the home as it is for commercial planting.

ELBERTA

Ripens middle of August. Yellow skin, with deep red cheek. Flesh is golden yellow, red at the pit, firm and juicy. Size runs from large to extra large. Freestone.

There is no peach so widely known as Elberta. It has been the standard for all other peaches almost since the date of its introduction. As a commercial peach it is without a peer. You would experience real difficulty if you attempted to find a large peach orchard without a block of Elberta.

FRUIT IS LARGE

In most localities it will rank as extra large. But its desirability is not based upon the size alone. The coloring of Elberta is practically perfect. The rich yellow skin is almost entirely covered with dark blush upon the sunny side. This appearance and the uniform size serve to sell it almost on sight. The flesh is juicy and tender, yet firm enough to hold its shape well when canned.

THE BEST COMMERCIAL PEACH

It has long been considered by experts the one best peach for growers, because, in addition to the merits mentioned above, it ships well and is comparatively free from rot. This means that it can be picked, boxed and shipped without spoilage, and that on the fruit-stand it will look as though it was picked the same morning. That is the real test of a commercial peach; it should not only grow and look well, but it should have stamina enough to still look its best when it reaches the retail agent.

Elberta may be picked a short time before it is entirely ripe, as it has the faculty of some apples in ripening after it has been picked.

BRACKETT

Ripens after Elberta. Orange-yellow skin, tinged with carmine. Flesh is deep yellow, highly flavored. Size is large to very large. Freestone.

**BRACKETT A THREE-POINT WINNER—IN COLOR,
IN SIZE, IN QUALITY**

Brackett ripens in our big commercial orchards a few days after Elberta. The fruit is rich yellow, with dark carmine cheek. The size runs fully as large or larger than Elberta, and fruits weighing 5 to 6 ounces are common. Flesh is deep yellow, extremely juicy, and is absolutely freestone. In every case the Brackett has proved the equal of Elberta, and in many cases the Georgia growers consider it a more profitable sort. One Southern peach grower claims that Brackett averages 50 cents a bushel higher than other varieties.

Brackett was propagated from buds cut in our own bearing orchards; therefore we know the trees are absolutely true to name. The commercial grower or the home orchardist who plants the Brackett will make no mistake either from the standpoints of production or profit.

5% off for cash with order.

PEACHES—(Continued)

J. H. HALE—Yellow. Very large in size, and globular in shape. Skin is thick, smooth and without fuzz. Flesh deep yellow, fine grain, firm, excellent quality. Good shipper. Ripens immediately after Elberta.

CARMAN—Ripens third week in July. Yellowish white skin with creamy white flesh, slightly tinged with red.

CHAMPION—Ripens first of August. Freestone. Fruits creamy white with red cheek.

Hale

EARLY ELBERTA—Ripens early in August. Large yellow peach of finest quality.

EARLY WHEELER (Red Bird Cling)—Very early, high colored peach, good size, firm, excellent shipper. White.

FOX—Ripens middle of September. Skin and flesh white. Freestone. The fruit is of unusually large size.

FRANCES—Ripens from August 25 to September 1. Skin yellow with white and yellow flesh.

GREENSBORO—Ripens June 15 to July 10. Skin yellow-white with a crimson cheek. Flesh white.

HEATH (White Heath Cling)—Ripens from September 1 to 25. Skin and flesh white, with tinge of crimson.

KRUMMEL—Ripens September 10 to 25. Skin yellow, crimson blush. Freestone. Fruit is quite large.

LATE CRAWFORD—Ripens few days after Elberta. Superb in size and shape. Flesh deep yellow.

MAMIE ROSS—White; freestone; ripens last of July.

RAY—Ripens August 10 to 20. Creamy white skin, spotted with deep crimson and yellow. Flesh white and firm. Size large. Freestone.

ROCHESTER—This is a new early yellow flesh of Crawford type. High quality.

SALWAY—Ripens September 10 to 25. Skin yellow, overlaid with chocolate red. Freestone.

SLAPPEY—Ripens July 12 to 25. Skin and flesh yellow. Freestone. One of the finest early varieties.

HARRISON GROWN CHERRY TREES

Montmorency Cherries.

**WE ARE LARGE GROWERS OF CHERRY TREES.
ASK FOR SPECIAL PRICES FOR 600 OR OVER.**

Sour Cherries

ENGLISH MORELLO—Dark red, almost black, juicy, tender and very acid. Tree is rather a slow grower, does not get very large.

MONTMORENCY—Ripens in early June. Fruit bright red, with solid, juicy flesh, richly flavored. One of the largest of the sour varieties. The tree is hardy, healthy, and extremely prolific, bearing full crops even in unfavorable seasons.

	1 to 9	10 to 29	30 to 299	300 to 599	} Trees

Harrisons' Nurseries, Berlin, Md., U. S. A.

RICHMOND (Kentish Virginia)—Ripens from middle to latter part of May. Fruit light red, of medium size, and very sour. Every landowner should have a few Richmond trees in his orchard. They seem to be at home in almost every section, are thrifty, healthy, and free bearers. For early market, Richmond is the best.

Sweet Cherries

BING—Dark brown or black. Good for the home garden.

BLACK TARTARIAN—June. The largest of the Sweet Cherries and one of the very best for dessert. The fruit is purplish black, with juicy, sweet, mild, pleasant, tender flesh. The tree is strong growing and vigorous and produces immense crops every year, the fruit growing in huge clusters, making it easy to pick. This variety is one of the most profitable to grow; it is always in demand and brings the best prices.

GOV. WOOD—End of June. Fruit light red, larger than most varieties, with rich, sweet flavor; hangs well on the tree. Trees are reasonably strong growers and free bearers.

NAPOLEON—Yellow, large, prolific bearer.

YELLOW SPANISH—June. An inch in diameter; pale yellow; delicious. One of the finest for canning, and makes a beautiful appearance in jars. The tree is a thrifty and vigorous grower, yielding abundant crops annually. It is, without exception, the best Heart Cherry grown, and most profitable to the commercial orchardist.

BARTLETT PEARS

Summer. A golden-colored pear, with a red cheek on most specimens. Bartlett is extra good for canning.

BARTLETT mellow and is excellent for eating very early. Flavor delicious and musky; flesh buttery, rich and juicy. One of the finest pears that grows to eat raw.

OTHER STANDARD VARIETIES OF PEARS

ANJOU (Buerre d'Anjou)—Color greenish yellow, with clear white flesh. The tree is a vigorous grower and bears freely.

CLAPP'S FAVORITE—Large, fine grained and juicy.

DUCHESS (Duchess d'Angouleme)—Ripens in October. Fruit large and of exceptional quality.

LE CONTE—Fruit large, with a smooth yellow skin. Considered desirable to use as a pollenizer for Kieffer.

SECKEL—Late September. Fruits medium in size, the finest flavored pear on the market.

WINTER NELLIS—Ripens mid-October and early November. Fruit dull russet, of medium size, fine.

DWARF PEARS—Duchess.

HARRISON GROWN PLUMS

Abundance Plums

ABUNDANCE—

Ripens in mid-July. Skin light amber-color, turning to bright cherry-red. Flesh is light yellow and very juicy. One of the best of the Japanese varieties.

BRADSHAW (Red)—

Very large fine early plum, dark reddish purple, juicy and good. Trees hardy and vigorous and very productive.

BURBANK—Ripens in late August and early September. Skin nearly red. Flesh deep yellow, sweet, and of a peculiar flavor. A hybrid Japanese variety.

ITALIAN PRUNE—One of the best varieties for drying, cooking or dessert.

RED JUNE—Ripens about mid-August. Skin vermillion-red. Light yellow flesh. Fruit medium to large, size ranging in quality with the best of the Japanese Plums.

SHROPSHIRE DAMSON—Ripens in September. Fruit dark purple, of medium size, and highly recommended for preserving. A variety that is one of the best for the North and succeeds well in the South.

EVERBEARING STRAWBERRIES

PROGRESSIVE—Pre-eminently a home garden berry, fruit may be shipped short distances if properly packed. Method of raising is same as for the other sorts, excepting for the first season all blossoms that come before the first or middle of July should be cut off.

EARLY STRAWBERRIES

CAMPBELL'S EARLY—Has "made a hit" with growers in New Jersey, productive and profitable.

PREMIER—Extra early. Fruit large, deep red clear through to the center. For home use and markets.

MIDSEASON STRAWBERRIES

KLONDYKE—Uniform, shapely, rich dark red, mild and delicious, juicy, and handsome; sell quickly. Plants are tall, compact, stalks strong; leaves light green. Abundant runners. Yields are wonderful. Blossoms are perfect but do not fully fertilize themselves and need other sorts near. Name is suggestive of results—often a gold mine. Our best-paying early berry.

BIG VALLEY—Its high quality recommends it as a home garden berry. Size of fruit and general characteristics similar to New York.

BUBACH—Large size and handsome color are its most valuable characteristics. Color is a beautiful bright red.

GLEN MARY—Strong, upright, large, dark green foliage. Produces remarkable crops when planted in rich ground.

HAVERLAND—Medium-early variety, fine appearance. Berries are medium to large, rich, bright red.

LUPTON—In favor with northern markets; good size; bright color.

MISSIONARY—Early. Medium size; good color, fine flavor.

NEW YORK—Popular for home gardens and nearby markets; large; few seeds; very sweet.

PARSONS—Begin to ripen at mid-season and continue until Gandy comes in. Dark red, thick, blunt, mild.

WARFIELD—Early. Rampant grower, with many runners. Berries glossy, dark red, rich, exceedingly juicy, very firm.

LATE STRAWBERRIES

GANDY—One of the latest Strawberries. Brings the very highest prices, and yields tremendous crops of a quality that leaves nothing to be desired in flavor, texture, color and keeping qualities. Bright red, smooth surface. Foliage broad and dark green. Borne on long, upright stems, well above the leaves and dirt.

AROMA—Late. Strong, sturdy plants; abundant crops nearly always, even if weather and soil are favorable.

BIG JOE—Brilliant red, with bright green calyx; flavor delicious; splendid for table or preserving.

CHESAPEAKE—Late. Fruit uniformly large, firm, and without green tips; does best in rich damp land.

GRAPES

Concord and Moore's Early Grapes

Soil seems to make little difference to the success of grape-vines, though it is probable that a heavy clay is better than a sandy soil. Vines live among rocks, on deep hillsides, and on rich bottom lands. They will grow in all parts of the world, north and south, on highlands and on lowlands, and seem to thrive nearly as well in one place as in another. As with most fruits, drainage is essential, and rarely will grape-vines thrive and produce where water stands for any length of time.

Newly planted vines should be mulched heavily with strawy manure for a space of about 2 feet around the roots. Add whatever commercial fertilizer the vines may lack. For the first season the canes may be tied to stakes or allowed to run on the ground; after that they should be trained on trellises.

Harrisons' Nurseries, Berlin, Md., U. S. A.

GRAPES

CONCORD—Ripens in early August. Fruit dark purple, almost black. Bunches of big berries, juicy, sweet, and delicious. Because of its extremely high merit. Concord is the most popular grape in the country. Taking the grape territory as a whole, more Concords are now in bearing than any other variety, nor does any other variety seem to succeed over such a wide range of territory. Ships well, and sells well.

DELAWARE—Ripens a little later than Concord. Berries are deep red and carried in small, compact bunches; The flesh is sweet and of the best quality.

MOORE'S EARLY—Ripens a little before the Concord. Very deep black, unusually large, and of extra-fine quality. The bunches are medium size, but are held together firmly. They stand handling and shipping unusually well and have an established reputation.

NIAGARA—Ripens in late August. Leading white market variety. Bunches of berries large; color greenish white, changing to pale yellow when fully ripe.

300 to 1000 plants, 3c each.

PARCEL POST PRICES: Parcel post, add two cents for each plant.

ST. REGIS—Fruit ripens very early, bears extremely heavy crops that sell for fancy prices, being so early; then in summer, until frost, gives fair to good pickings, dependent in part on the season. Extremely hardy and vigorous and free from disease.

CUMBERLAND—Ripens mid-season. Fruit jet-black, large and handsome. Plants healthy and productive.

EUREKA—One of the earliest varieties. Black berry, good size and valuable for early market.

CUTHBERT—Late. Fruit medium large, deep rich crimson. Leading red variety, when quality, productiveness and general hardiness is considered.

KING—Probably the earliest red variety. Plants are strong growers and productive for so early a sort.

St. Regis Raspberry

LOUDON—Red. medium to large, good cropper.

DEWBERRIES

MAYES (Austin)—Black berries, large size, excellent flavor, produced in large quantity.

LUCRETIA—Fruit jet-black, larger than other varieties. By many growers is considered one of the best. Plant a stronger grower and bears enormous crops.

10 to 29 plants, 6c each; 30 to 299 plants, 4c each.

PARCEL POST PRICES: Parcel post, add two cents for each plant.

HARRISON GROWN ASPARAGUS

Palmetto Asparagus

The preparation of the bed should be made in a most thorough manner, as it is to last for a number of years. A deep, sandy loam with an abundance of decayed organic matter is the best soil.

Planting is best done in the spring as early as the soil can be worked in good condition. Run furrows with plow and clean out with shovel to a depth of 1 foot. Place well-rotted stable manure thickly in the trench, then just a slight covering with the soil, on top of which place the crowns about 2 feet apart; spread out the roots and cover them very shallow. After the plants start to grow, work the soil to them gradually until it becomes level. The plants should be frequently cultivated and kept clean.

The dead tops should be mown off in the fall and furrows should be thrown on the rows from each side, and the middles cleaned out. This will cause the bed to warm up early in the spring.

If big shoots are wanted you must manure and fertilize heavily, for on the fertility of the soil depends the profit of the crop. Five hundred pounds of kainit to an acre, applied in the fall when bedding, and five hundred pounds of fish or tankage, and five hundred pounds of acid phosphate harrowed in, in the early spring, will answer where commercial fertilizers are used. Asparagus is a gross feeder, and the soil can scarcely be made too rich.

BARR'S MAMMOTH.

CONOVER'S COLOSSAL—A rapid growing variety and often ready for cutting the second year.

GIANT ARGENTEUIL.

PALMETTO—Ten days to two weeks earlier than most other varieties. The stalks vary from dark to light green, are quite large and of exceptionally good quality.

PRICES—TWO YEAR GROWN

50c for 10, \$2.00 for 100, \$10.00 per 1,000; 2,000 to 5,000 at \$9.00 per 1,000; 5,000 to 25,000 at \$8.00 per 1,000.

SUGGESTIONS FOR OUTDOOR PLANTING

Front of House Planting

A group of dwarf and tall evergreens adapted for planting on either side of the house entrance. If the entrance is not located as shown in the sketch, the selection of evergreens is such that it can readily be adapted to a broad planting in front of the porch, or to a planting at the side of the house. The price for the 22 plants is \$75.

Specimens Furnished for Plan No. 2

Norway Maple.

MAPLES

NORWAY Maple for lining the sides of lanes and roads, for the lawn, for streets, for protecting the house from sun and weather and for real permanent worth in landscape planting, there are no other trees so thoroughly valuable as the Norway Maples. They are at home in almost any situation, without regard to soil or climate. The Norway Maples in our nursery have straight trunks, with well-rounded and symmetrical heads. They have been properly cared for by cultivation and by pruning, and are superior in every way.

HARRISON GROWN IRIS OF RAINBOW HUES

PARCEL POST PRICES: Should you desire us to ship by parcel post, add five cents for each plant when remitting.

We have a large block of Iris which was grown solely for the purpose of selling in collections as mixed sorts.

The plants were propagated from some of the most popular named varieties and, of course, bear all of the most desirable characteristics of the parents.

1 to 9 plants, 25c each; 10 to 29 plants, 20c each; 30 to 299 plants, 15c each.

HARRISON GROWN DAHLIAS IN MIXTURE

NOTE: We ship Dahlias in the spring only.

An assortment of some of the choicest specimens of Show, Fancy, Cactus and Pompon classes, in their varying types and colors.

1 to 9 plants, 25c each; 10 to 29 plants, 20c each; 30 to 299 plants, 15c each.

PARCEL POST PRICES: Should you desire us to ship by parcel post, add five cents for each plant when remitting.

HARRISON GROWN GLADIOLI IN MIXTURE

NOTE: We ship Gladioli in the spring only.

A mixture of extra good varieties.

1 to 9 plants, 10c each; 10 to 29 plants, 9c each; 30 to 299 plants, 8c each.

PARCEL POST PRICES: Should you desire us to ship by parcel post, add two cents for each bulb when remitting.

PEONIES

Fall is the best time in the year for planting Peonies.
Order now.

PARCEL POST—Add five cents for each plant.
Prices: 50c each, \$2.75 for six; special quotations on large lots.

DUCHESS DE NEMOURS—A magnificent flower, white crown, creamy collar, free from spots or flecks of other color. Blooms large, double, and produces freely. Desirable for massing. Fragrant.

EDULIS SUPERBA—Rosy pink, sometimes striped carmine. Very early.

FELIX CROUSSE—A brilliant red peony. Large blooms, typical bomb shape, and quite fragrant. Plants strong and bloom freely.

FESTIVA MAXIMA—Probably the most popular peony in existence. Center white, with here and there a fleck of crimson. Large and fragrant. Vigorous and free bloomer.

MADAME DE VERNEVILLE—Blush when opening, changes to pure white, with many distinct carmine flecks. Blooms large and full, produces freely, and delicately fragrant.

UMBELLATA ROSEA—Earliest light Pink. Fragrant and fine.

TERMS F. O. B. BERLIN, MD.

We allow 5% discount for cash with order or prior to date of shipment. Otherwise terms net.

All agreements and contracts are made subject to loss of crop by drought, floods, fire, insects, or other unavoidable causes. All quotations are made subject to stock being sold on receipt of order.
WE STRIVE TO AVOID MISTAKES, but in the event that any nursery stock sold by us should prove untrue to name under which it is sold, we hereby agree, on proper proof of such untruthfulness to name, to replace the original order or to refund the purchase price. Except for such liability, and in respect to all nursery stock sold by us, we give no warranty, express or implied, as to description, quality, productiveness or any other matter.—HARRISONS' NURSERIES.
TRANSPORTATION RULES. We have always made it prominent in our printed terms that our goods are sold f. o. b. cars at point of shipment and are at the purchaser's risk while in transit. We do not guarantee safe delivery. The ownership of all goods sold by us passes to the purchaser on delivery by us to the carrier and the issuing of a receipt by the carrier ends our responsibility. Any claims for damages should be made promptly to the agent at the point of delivery.—HARRISONS' NURSERIES.
IMPORTANT. Please write name and address plainly, and fill all blanks correctly. Always state how goods shall be sent, attach price to each article and add up accurately. Please be sure to use a separate sheet for letter and bring out your ideas briefly and clearly. More order sheets sent on request.
No difference how often you have written us, always give your full Address, and write your Name, Post Office, County and State very plainly. By so doing you will save us much trouble and avoid the possibility of delay and mistake.

Table with 5 columns: Quantity, Kind and Variety Wanted, Size, Price, Total. Includes a row for 'We accept Liberty Loan Bonds, at face value.'

We ship all winter to Southern States from trees stored in our large cellars. Our regular Fall Shipping Season opens October 1. State positively how we are to ship, whether by Freight, Express or Mail. If by Freight or Express, give name of Railroad Station and your Post Office.
Please Give the Price and Size, to Avoid Errors and Lost Time
